

OrthoPediatrics Corp. Launches Infant Locking Proximal Femur Plating System

June 28, 2016

WARSAW, Indiana, June 28, 2016 — OrthoPediatrics Corp. is pleased to announce the release of its PediLoc® Infant Locking Proximal Femur (LPF) Plating System. The addition of the Infant LPF System further expands the PediLoc® portfolio, which is a comprehensive system for treating pediatric hip deformity or trauma.

The OrthoPediatrics PediLoc® LPF System features an expansive array of plate configurations, angles, offsets and sizes to address the needs of each individual patient. Coupled with cannulated locking screws and streamlined instrumentation, the PediLoc® LPF system can accurately and reliably treat multiple pediatric hip pathologies. With the addition of the Infant LPF system to the existing child and adolescent offerings, all children – regardless of size – can now be treated with a PediLoc® LPF plate.

Joe Hauser, OrthoPediatrics' Vice President of Trauma & Deformity Correction, said, "We are pleased to offer the PediLoc® Infant Locking Proximal Femur System to our surgeon customers and the kids they treat. These unique, infant-sized plates build upon the Company's comprehensive, market leading hip product portfolio. The PediLoc® Infant LPF system provides pediatric orthopedic surgeons with an improved plating option for even the smallest kids. As the only company exclusively focused on pediatric orthopedics, this new product offering further demonstrates our commitment to the cause of improving the lives of children with orthopedic conditions."

About OrthoPediatrics Corp.

Founded in 2006, OrthoPediatrics is the only orthopedic company focused exclusively on providing a comprehensive product offering to the pediatric orthopedic market in order to improve the lives of children with orthopedic conditions. OrthoPediatrics currently markets 17 surgical systems that serve three of the largest categories within the pediatric orthopedic market. This offering spans trauma and deformity, complex spine and ACL reconstruction procedures. OrthoPediatrics also has the only global sales organization focused exclusively on pediatric orthopedics and distributes its products to 29 countries outside the United States.
