

Global POISE Study Reaches Milestone of 600 Orthopedic Implants in Pediatric Patients, Advancing Research on the Safety and Efficacy of OrthoPediatrics® Products

Jul 16, 2025

WARSAW, Ind., July 16, 2025 (GLOBE NEWSWIRE) -- OrthoPediatrics Corp. ("OrthoPediatrics" or the "Company") (Nasdaq: KIDS), a company focused exclusively on advancing the field of pediatric orthopedics, today announced a significant milestone in the ongoing Global POISE (Pediatric Orthopedic Implant Safety and Efficacy) Study: more than 600 implants are now being observed across 300+ pediatric patients as part of this study.

Global POISE is a multi-center, post-market, prospective clinical follow-up study, designed to assess the safety and efficacy of a range of OrthoPediatrics' implant devices. This international study is focused on verifying implant survival and identifying any device-related adverse events. Launched in 2023, Global POISE now includes 13 active sites and growing, with data currently being collected from Canada, the United States, Australia, New Zealand and South Africa.

The insights generated from this study will inform further refinement of OrthoPediatrics devices to meet the specific needs of growing children with orthopedic conditions. The sites involved in Global POISE are committed to broadening the study's reach and continue to enroll additional patients across 17 different implant types to further enhance the understanding of their safety and long-term effectiveness.

OrthoPediatrics' Sr VP of Quality, Clinical and Regulatory Affairs, Ray Garrison, commented, "We are thrilled to see the Global POISE Study reach this significant milestone. This achievement is a testament to the dedication and collaboration of OrthoPediatrics and the research team at BC Children's Hospital. As the study continues to expand, we are excited about the valuable insights it will generate that will ultimately improve the outcomes for children undergoing orthopedic procedures around the world. OrthoPediatrics remains committed to advancing pediatric orthopedic care through innovative solutions designed to meet the unique needs of young patients."
